

User documentation for Magento Stock Sync app

Installation

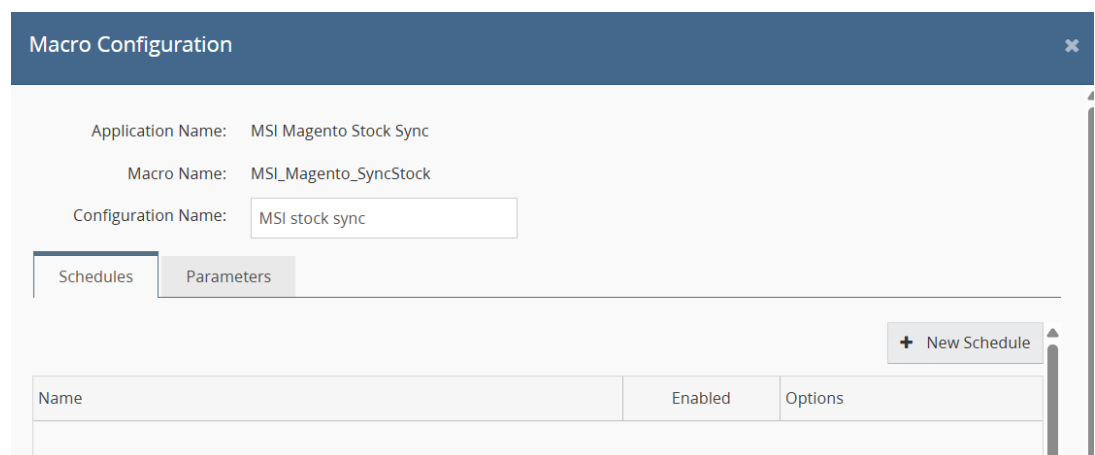

1. Go to Apps > Macro Configuration

2. Click the “Add Configuration” button. Select the installed application and click the “Create configuration” button.

3. Add configuration name and create schedules.

4. Then go to the parameters tab and fill in the macro parameters.

Macro Configuration

Application Name: MSI Magento Stock Sync

Macro Name: MSI_Magento_SyncStock

Configuration Name:

Schedules

Parameters

Name	Type	Description	Value	ReadOnly	Required
excludeltemEpName	Text	Extended property name, which indic...	<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>
locationNamesListStr	Text	Comma separated list of locations in ...	<input type="text"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
magentoSourceCode	Text	Source code on Magento	<input type="text"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
magentoUrl	Text	Magento server URL (without "/" at th...	<input type="text"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
magentoUserName	Text	Magento credentials	<input type="text"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
magentoPassword	Text	Magento credentials	<input type="text"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
sku	Text	For testing on one item. When tested...	<input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>

- *excludeltemEpName*: Extended property name, which indicates that item should be excluded from update.
- *locationNamesListStr*: Comma separated list of locations in Linnworks from which items Stock levels will be combined.
- *magentoSourceCode*: Source code on Magento.
- *magentoUrl*: Magento server URL (without "/" at the end).
- *magentoUserName*: Magento credentials.
- *magentoPassword*: Magento credentials.
- *sku*: For testing on one item. When tested and ready to go live, set empty.

5. Save the configuration

6. Find newly created configuration at the end of the list and enable it.

App business logic

Key Features:

- Spots items with mismatched stock between Linnworks and Magento, then automatically updates Magento with the accurate Linnworks quantity.
- Pulls together inventory from several Linnworks locations and matches it up with your chosen Magento source for super-accurate stock updates.
- Exclude items you don't want to update with a simple ExtendedProperty.
- Test the application's functionality on a single SKU before full deployment by simply entering the SKU in the macro configuration.
