

# User documentation for PackageSplitter app

## Installation

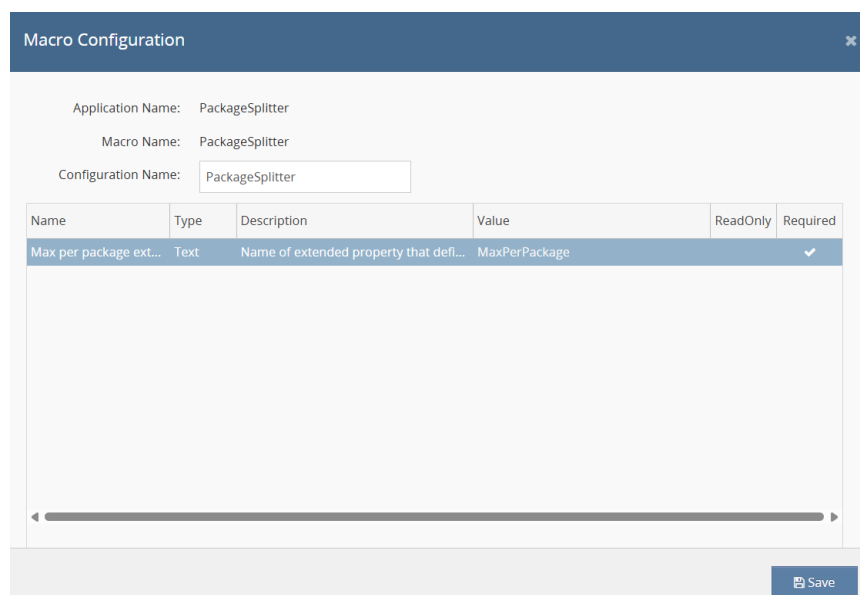

1. Go to Apps > Macro Configuration

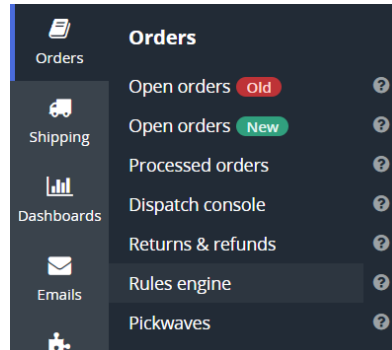

2. Click the “Add Configuration” button. Select the installed application and click the “Create configuration” button.

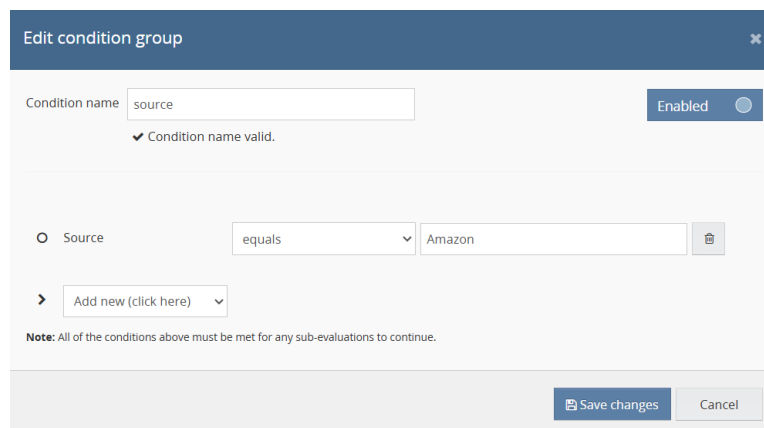

3. Add configuration name and fill in macro parameter “Max per package extended property name.

4. Save the configuration
5. Find newly created configuration at the end of the list and enable it.
6. Go to Orders > Rules Engine

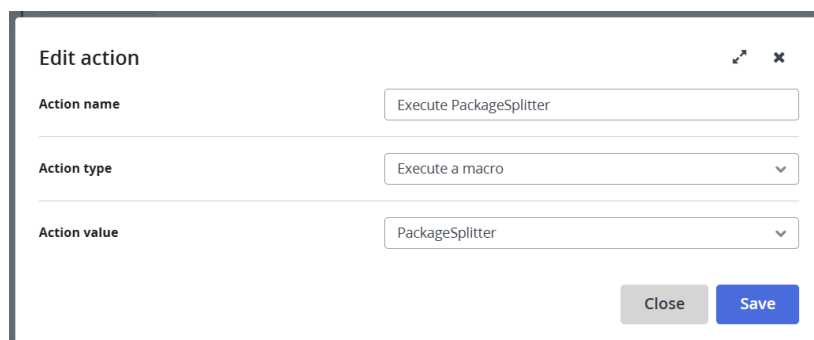

7. Add a new Rule and open it to edit.
8. Add Condition to filter orders by source for ex. (If you need to run the application on every single order, just name condition and save)

The 'Edit condition group' dialog box has a title bar with a close button. It contains a 'Condition name' input field with the text 'source' and an 'Enabled' toggle switch. Below the input field is a checkmark and the text 'Condition name valid.'. There is a section for adding conditions with a radio button labeled 'Source', a dropdown menu showing 'equals', and a text input field containing 'Amazon'. Below this is a button labeled 'Add new (click here)' with a dropdown arrow. A note at the bottom states: 'Note: All of the conditions above must be met for any sub-evaluations to continue.'. At the bottom right are 'Save changes' and 'Cancel' buttons.

9. Then add Action with type "Execute a macro" and in value choose the recently created configuration.

The 'Edit action' dialog box has a title bar with a close button. It contains three fields: 'Action name' with the text 'Execute PackageSplitter', 'Action type' with a dropdown menu showing 'Execute a macro', and 'Action value' with a dropdown menu showing 'PackageSplitter'. At the bottom right are 'Close' and 'Save' buttons.

10. Save and enable the rule.

---

## App business logic

### Key Features:

- Assign each unique item to its own individual package: The application automatically assigns each unique item in the order to its own individual package.
- Define maximum number of identical items packed together: Using item's extended properties you can define max quantity of identical items that can be packed together.
